SCOPE | SCHEDULE | BUDGET

GUESTROOMS

- Networked thermostats
- Fan coil & WSHP units
- VRF Conversions

INDOOR AIR QUALITY

- BI Polar ionization
- UV Lighting
- Supplemental filtration

AIR HANDLERS

- Energy recovery units
- VAV system design
- Single-zone VAV conversions
- Dedicated outside air systems

CHILLERS

- Plant design & equipment selection.
- Flow measurements
- Variable Primary Flow (VPF) conversions
- Chilled water economizing

COOLING TOWERS

- Water consumption calculations
- Phased tower replacement
- Chemical treatment systems
- Refurbishment

WATER HEATERS & DOMESTIC WATER SYSTEMS

- High-Efficiency equipment upgrades
- Storage tank refurbishment
- Domestic water booster pumps
- Solar hot water installations

BOILERS

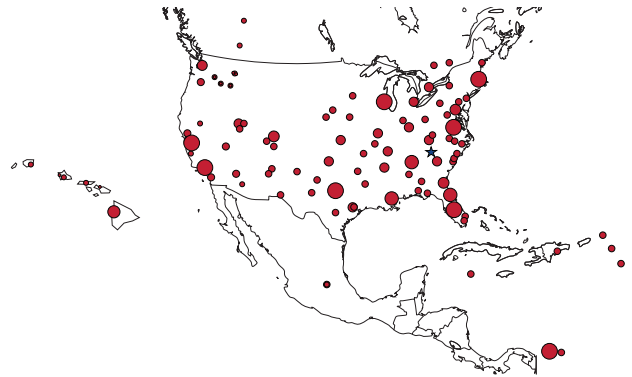

- System design & equipment selection
- Combustion analysis
- Heat exchangers
- Heat recovery

REFRIGERATION

- Self-Contained and RAC Replacements
- Energy Surveys
- Project Support & Management

MSS has managed over 5,000 projects at
1,400+ Locations
in North & Central America

MSS can help your property with:

- CapEx creation / Budgeting
- Property Improvement Plans (PIP)
- Compliance with brand standards.
- Humidity concerns
- Negative building pressure
- Low guest bathroom exhaust
- Hot water complaints
- Domestic water pressure
- Project ROI / Payback analysis
